DETAILED ACTION

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1, 3-19, 27-29, and 33-37, drawn to a ceramifying composition.

Group II, claims 19-26, drawn to a cable.

3. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The technical feature linking the claims is composition comprised of a polymer, silicate mineral filler, inorganic phosphate and optionally additional inorganic filler wherein the composition forms a ceramic on exposure under fire conditions. However, von Bonin et al. (US Pat. 4,992,481) teaches flame resistant elements comprising organic polymers, ammonium polyphosphate, aluminosilicates, aluminum hydroxide and additional fillers. They form a ceramic on exposure to fire. Therefore, the technical feature linking the claims does not constitute a special technical feature as defined by PCT Rule 13.2, as it does not define a contribution over the prior art. Accordingly, Groups I and II are not so linked by the

same or a corresponding special technical feature as to form a single general inventive concept.

4. A telephone call was made to Edwin Merkel on 11/6/08 to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

6. The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
